Subject: SCPSC Docket 2005-385-E Solar Net Metering Regulation in SC

Dear Commissioners, This e-mail is in support of changing net metering rules to encourage wider use of solar energy.

I am happy that you are developing progressive policies that will move South Carolina away from dependency on fossil fuels.

I support the following:

- increasing the current 100kw limits for generating solar energy for commercial systems to 2 MW
- raising the .2% cap for total statewide capacity of 2% of peak demand so more households and non-profits can utilize solar power.

I am also requesting that you immediately reschedule the cancelled public form to allow a transparent discussion about solar energy in SC.

Thank you.

Mary J. Steffes
